

## Curonics

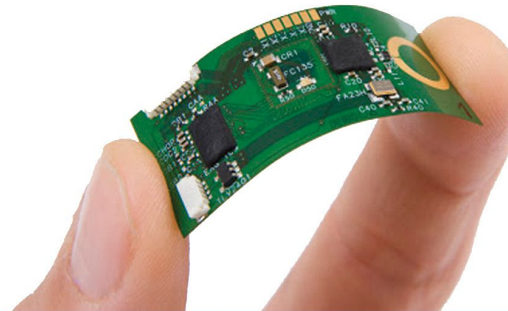

Curonics Semiconductor designing Company established in 2010 and has hands on experience and detailed knowledge in designing PCB's. We have worked on different domains with cutting edge PCB manufacturing technologies. Our depth knowledge on understanding electronic circuits, board materials and manufacturing process, we can provide faster cycle time and the right designs which should help you to reduce time to market of your products.

We have a Team of Expertise Designing Engineers with well Experience knowledge in the field of ATE & Evaluation Boards. We are ready to provide you with a PCB Designing Service with the Quality of World Class Standard Level.

We strongly believe that our unique expertise is about providing timely and cost-effective support with Quality. Our engineering abilities are the key factor for our clients to expect single point solution for their products development.

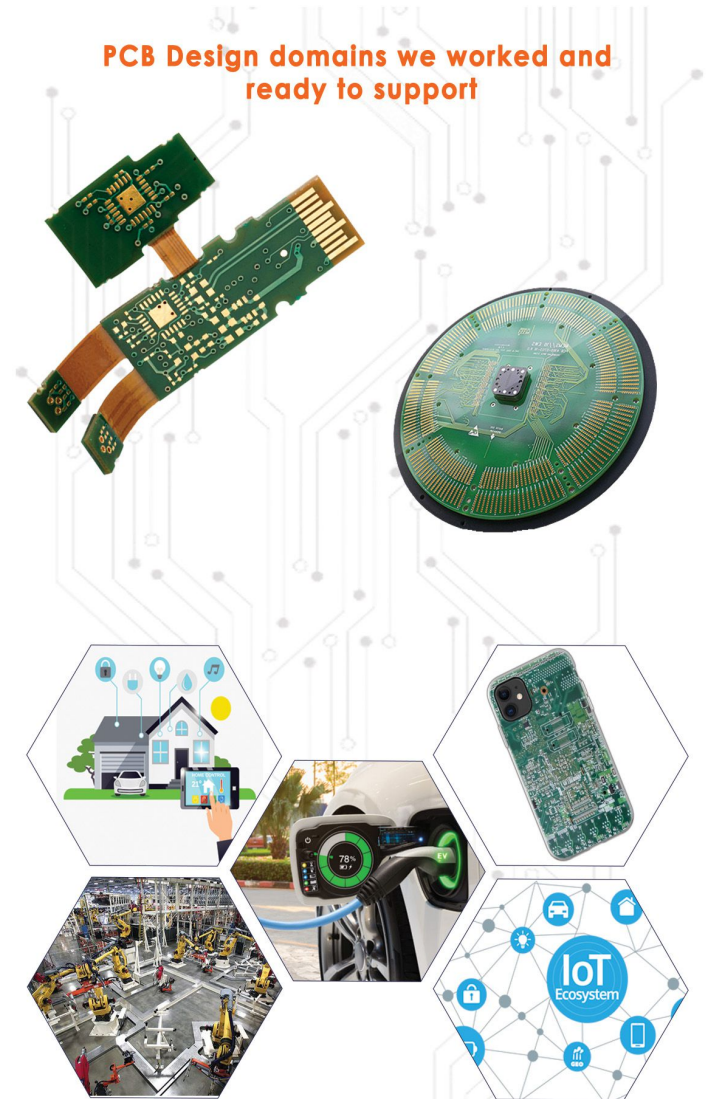

## Expertised in Commitment and High-Quality Standards.

### Our Services at a Glance

- Library Creation per IPC 7351
- Schematic creation and capturing
- PCB Designs Per IPC2221
- Rigid PCB Designs per IPC2222
- Flexible PCB Designs per IPC2223
- Combination of Rigid-Flex Boards
- Expertise on single- and double-layer PCB designs
- Expertise on Multi-layer PCB designs up to 50 Layers
- Expertise on IDF import, exports and balanced Stack up Planning, Hybrid stack ups
- Expertise on board materials like FR4, Nelco, Rogers, Megatron 6 and MW2000
- Expertise on boards like HP93K, J750, Ultraflex, Integraflex, Microflex
- Expertise on boards of Evaluation board, Bench board, Characterization board, Burn in board.

### PCB Design domains we worked and ready to support

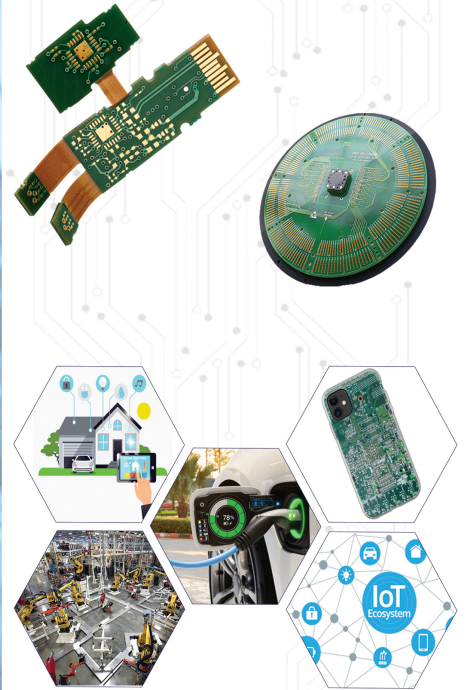

### Well Experienced Tool Knowledge in

**Mentor Pads**  
**Mentor Expedition**  
**Allegro**  
**Altium**  
**Orcad**

# Our Experienced PCB Designers can Make Your Ideas Alive!
